Philips Huy Nguyen

Senior Backend Software Engineer

Atlanta, GA | (414) 364-2335 | philips.nguyen96@gmail.com | philipsnguyen.com | linkedin.com/in/philips-nguyen

SUMMARY

Senior backend software engineer with 8+ years of experience designing, building, and operating distributed, cloud-native systems in the financial services and retail industries. Expertise in Java (Spring Boot), C# and .NET, REST and gRPC API design, event-driven systems with Kafka, and Google Cloud Platform. Track record of shipping scalable APIs, owning production reliability through on-call support, observability, and resiliency engineering, and mentoring engineers on Agile Scrum teams.

TECHNICAL SKILLS

Languages: Java, C#, SQL, TypeScript, JavaScript, YAML
Backend & APIs: Spring Boot, .NET Core, REST, gRPC, OpenAPI, Microservices, Event-Driven Architecture, Distributed Systems
Frontend: React, Next.js, AngularJS
Cloud: Google Cloud Platform (GKE, Pub/Sub, Cloud Run, Cloud Storage), Azure (App Services, AD B2C, Pipelines)
Messaging & Data: Kafka, MongoDB, SQL Server, Redis
DevOps & IaC: Docker, Kubernetes, Helm, Terraform, CI/CD, Jenkins, GitLab CI, GitHub Actions, Azure Pipelines
Observability & Quality: DataDog, Grafana, Prometheus, ELK Stack, SonarQube, Unit Testing
Practices: Agile/Scrum, Performance Optimization, Monitoring and Alerting, Resiliency Engineering, Root Cause Analysis, Incident Response, On-Call Support, Mentoring

PROFESSIONAL EXPERIENCE

Zebra Technologies | Chicago, IL
Software Engineer | July 2021 – Present

- Design and deliver 9+ highly scalable Java Spring Boot gRPC APIs for a cloud-based, distributed SaaS product on Google Cloud Platform, using Kafka and MongoDB, as part of a Scrum team.
- Serve as on-call support engineer accountable for production stability; build resiliency plans and improve recovery operations for mission-critical services to maintain high availability.
- Automate complex system processes with monitoring and alerting (DataDog, Grafana) and resolve availability and performance issues to meet 100% of non-functional requirements; enforce code quality with SonarQube.
- Partner with 4+ external integration and testing teams, providing technical consulting and advising to support delivery initiatives.

Northwestern Mutual | Milwaukee, WI
Software Engineer | May 2016 – July 2021

- Designed and documented scalable REST APIs for CRUD operations on SQL databases, handling 100,000+ requests per day for 5+ applications.
- Implemented features and bug fixes in Java services processing 5,000,000+ sensitive customer records.
- Application owner for a suite of .NET applications with 5,000+ users; ensured stability, security, and code quality.
- Enforced CI/CD patterns for 10+ applications across 10+ teams; maintained repositories and environments for 100+ developers and testers.
- Built proactive monitoring solutions by parsing 1,000+ application and user log files to generate predictive metrics.
- Wrote automated unit tests to reach 80% coverage and resolved 100% of critical SonarQube issues.

Vietnamese Eucharistic Youth Movement (VEYM) | Anaheim, CA
Volunteer Backend IT Lead | October 2019 – Present

- Lead regional technology decisions and initiatives, managing a team of 10+ teammates.
- Design and implement software solutions for a worldwide non-profit organization.
- Manage the backlog and partner with stakeholders to define IT needs, advocating for user-centered design.

PROJECTS

VEYM Membership Platform | Next.js, .NET Core, SQL, Azure | members.veym.net

- Lead engineer for an HR membership and directory system serving 6,000+ members on Azure App Services; own architecture, system design, API implementation, CI/CD, Azure AD B2C integration, and support.
- Secured the REST API with Active Directory group authorization, automated deployments with Azure Pipelines, and built robust logging; authored architecture diagrams and user guides, and mentor interns.

EDUCATION

University of Wisconsin–Milwaukee | Milwaukee, WI
Bachelor of Science (B.S.), Computer Science
